

TECHNICAL SERVICE BULLETIN

Part #:	OPG-02132023	Engine:	Various
Date:	02/13/2023	Title:	Oil Pan Gasket

- We recommend the use of a high quality silicone in place of the oil pan gasket for the following product lines:
- CUMMINS: 5.9L, 6.7L, and 8.3L
- POWERSTROKE: 6.7L
- High quality silicone is far superior to the OE style gasket. Use the OC silicone or equivalent.

WARNING: EXCESSIVE AMOUNT OF SILICONE CAN END UP IN THE PISTON COOLERS, RESULTING IN PISTON AND CYLINDER WALL DAMAGE.
